

## ABOUT US

**PrymeFix is the fixturing line for PrymeTech, a leading manufacturer of CNC machined components and sophisticated metrology fixturing solutions.**

PrymeTech offers an extended machine shop without the headaches of overhead and maintenance. Our experienced staff can take a product from concept to creation. We understand what it takes to design, manufacture and inspect product. We combine innovative design solutions with state of the art machining technologies to provide our customers with high quality precision CNC machined component parts for a wide variety of industries. Established in 2006, our shop includes all of the amenities expected to be found in a modern day shop. Every tool and machine has been strategically placed to make our facility as efficient as possible. Our shop stays highly organized based on industry concepts like Khan ban and 5-S. Our staff includes experienced machinists as well as highly educated engineers. Working together as a team, we have fully integrated proven machining techniques with state of the art technology. Computer Aided Design (CAD) and Computer Aided Machining (CAM) is utilized on a daily basis to ensure product accuracy. At PrymeTech, we expect the best from our employees. Our customers see the difference.

# PrymeFix

## INSERTS

## ACRYLIC INSERTS

Universal Acrylic Inserts are light weight and allow back light to pass through them. Steel bars along the perimeter allow them to snap into all PrymeFix Corners. Leveling feet allow for fine adjustment on the resting surface.

These inserts come in a variety of hole pattern styles and sizes. Accompanied with a standoff kit, a user can fixture almost anything imaginable!

## ALUMINUM INSERTS

Universal Aluminum Inserts can be used for fixturing with both CMMs and Vision Systems. Available in 3 sizes, each with a 1"x1" spaced complete hole pattern. A calibration sphere can easily be mounted to any of the nine differently located M8 holes on all sizes. Steel strips along the edge allow the inserts to snap into all PrymeFix corners!

## CALIBRATION INSERTS

Calibration inserts hold a variety of calibration artifacts such as calibration spheres, gage blocks, glass reticles, and laser artifacts.

Just like regular inserts, each calibration insert has leveling feet and steel strips allowing them to magnetically snap into any PrymeFix corner.

## CENTERS INSERTS

A centers insert is PrymeFix's answer to holding cylindrical parts on center and parallel to your measurement system. The fixture is adjustable in length to accommodate short or long parts. The anvils are replaceable to allow for an ideal configuration to hold a variety of parts.

For more details and a complete product listing, check out the PrymeFix website!
