

ABOUT US

PrymeFix is the fixturing line for PrymeTech, a leading manufacturer of CNC machined components and sophisticated metrology fixturing solutions.

PrymeTech offers an extended machine shop without the headaches of overhead and maintenance. Our experienced staff can take a product from concept to creation. We understand what it takes to design, manufacture and inspect product. We combine innovative design solutions with state of the art machining technologies to provide our customers with high quality precision CNC machined component parts for a wide variety of industries. Established in 2006, our shop includes all of the amenities expected to be found in a modern day shop. Every tool and machine has been strategically placed to make our facility as efficient as possible. Our shop stays highly organized based on industry concepts like Khan ban and 5-S. Our staff includes experienced machinists as well as highly educated engineers. Working together as a team, we have fully integrated proven machining techniques with state of the art technology. Computer Aided Design (CAD) and Computer Aided Machining (CAM) is utilized on a daily basis to ensure product accuracy. At PrymeTech, we expect the best from our employees. Our customers see the difference.

CUSTOM FIXTURES

Part Specific Gang Up

PART SPECIFIC

Part specific fixtures can be designed for complex parts or assemblies that regular fixturing kits cannot hold.

Provide PrymeTech with a CAD model and sample part and we can design custom fixturing specific to your part. Our design engineers and machine operators work together to make sure all fixtures hold parts as intended before delivery.

All PrymeTech engineers have experience programming CMMs and Vision Systems and know what is necessary to easily and reliably measure a part. Back lighting, probe clearance, part security, ease of loading and unloading are all considered in our design process.

GANG UP FIXTURES

Gang-Up Fixturing can be created for holding an entire batch of parts at once. This can be a huge time saver when measuring a large volume of parts and pays for itself in no time with the increase in efficiency.

Hire PrymeTech to write a program for your new Gang-Up Fixture and get a turn-key solution based on your specific needs.
