

Does your VARI-ROLL equipment look like the photos to the right?

Your VARI-ROLL Gear Tester has provided you with years, if not decades of reliable service. However, like any piece of equipment that's started to show its age, it may have issues with accuracy and performance. As the manufacturer, Precision Gage Company can refurbish and calibrate your gear tester to get it back into like new condition.

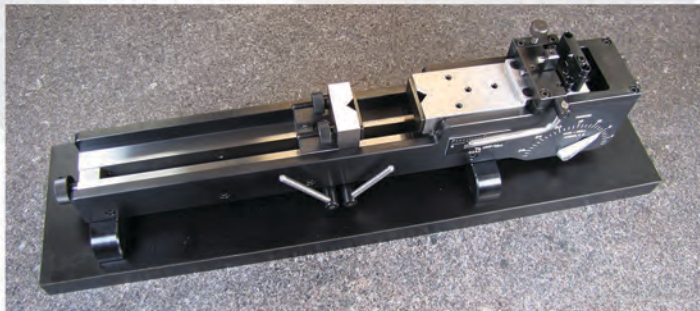

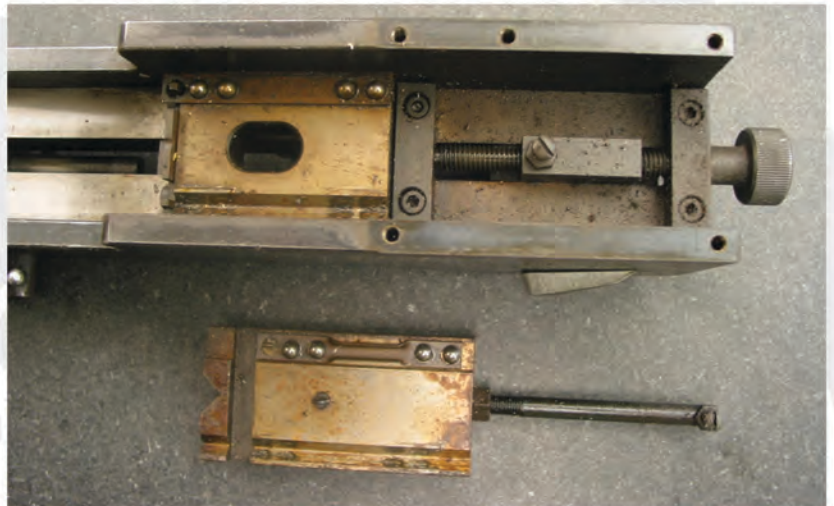

All at the fraction of the cost of a new unit!

Contact us today to see if our Calibration & Rebuild Program can breathe new life into your gear testing equipment.

On-Site Calibration is also available to reduce downtime.

VARI-ROLL

+ Models Supported in the Rebuild Program

- VARI-ROLL Basic Units
 - VR-A thru VR-G both short & long beds
- VARI-ROLL Attachments
- Other Models
 - Alina Testers
 - GearMaster
 - ITW Testers
 - S&F Testers

Contact us if you don't see your model listed.
